Aloha Employees, Residents, Families and Friends:

As of today, we have confirmed three employees that tested positive for COVID-19.

COVID testing for residents and employees continues. If a positive result is found, all parties will be notified. The facility will continue to post updates as they become available.

Due to the high number in positive cases, we highly encourage family and friends to visit with your loved ones that are in our facility via Zoom or FaceTime. If you are interested in visiting virtually, please contact our TR Activities Department at (808) 441-9553.

Active Cases:

Resident	N/A	5/5/2022	In quarantine

Recovered Cases since 4/12/2022:	
Employees	19
Residents	28

We continue to follow CMS, CDC and Hawaii Department of Health guidelines and are taking all measures to prevent further spread. These measures include, but not limited to: employee antigen testing, monitoring for symptom development, employees are required to wear appropriate personal protective equipment, frequent hand washing and following infection prevention measures while performing job duties, caring for residents and social distancing during meal breaks. We also continue to clean and disinfect commonly touched areas. In addition, when an employee or resident tests positive, contact tracing is performed to identify close contacts to guide quarantine decisions. We offer and encourage residents to wear face masks, we monitor residents for symptom development throughout each shift, and conduct rounds of antigen testing.

Reminder COVID-19 symptoms include: runny nose, headache, sore, dry, or scratchy throat, cough, fever, nasal congestion, chest congestion, sneezing, chills, muscle ache/pain, unusual tiredness or fatigue, nausea, vomiting, diarrhea, loss of taste and/or smell, shortness of breath or other respiratory illness. If you experience any of the above symptoms, please contact your health care provider and notify us if you have recently visited the facility. Please postpone your visit until you are feeling better. The Omicron variant is easily transmissible from one person to another, we all must stay vigilant in protecting each other.

If you have questions or concerns, please call Veronica at (808) 247-2220 ext. 527.

Veronica Kemp, RN
